00 零基础1小时学编程,安装软件

零基础1小时学编程,极简教程,简到奔溃

这个极简教程以电商平台系统作为演示,零基础1小时极速入门,挑战不可能的任务,马上开车,Are you Ready?

安装软件

- 一、Visual Studio 2017开发工具
- 二、MySq1/MariaDB/TiDB开源数据库
- 三、MySql/MariaDB/TiDB管理工具HeidiSql

- 一、Visual Studio 2017开发工具
- 1、点击Download Visual Studio 2017下载

 $\underline{\texttt{https://docs.microsoft.com/en-us/visualstudio/release notes/vs2017-relnotes}$

Download Visual Studio 2017

2、下载VS2017企业版Enterprise

- 3、安装VS2017时,选择安装三个模块:
- .NET桌面开发、ASP.NET和Web开发、.NET Core跨平台开发

正在修改 — Visual Studio Enterprise 2017 — 15.6.2

VS2017安装大约需要15分钟-30分钟,为了节省时间,可以同时进行下面软件的安装

- 二、MySq1/MariaDB开源数据库
- 1、MariaDB是MySql创始人开发的开源数据库,更轻量高性能,兼容MySql

https://downloads.mariadb.org/

MariaDB 10.2 Series

MariaDB 10.2 is the current **stable** release of MariaDB. It is built on MariaDB 10.1 with features from MySQL 5.6 & 5.7, features not found anywhere else.

See "What is MariaDB 10.2?" for an overview.

MariaDB 10.3 Series

MariaDB 10.3 is the current **development** release of MariaDB. It is built on MariaDB 10.2 with new features not found a

See "What is MariaDB 10.3?" for an overview.

2、下载 mariadb-10.3.5-winx64.msi 大小 55M, 点击箭头所示mariadb-10.3.5-winx64.msi链接,下一个界面不用填表单,直接点击【No thanks just take me to the download】

File Name	Package Type	OS / CPU	Size	Meta
mariadb-10.3.5.tar.gz	source tar.gz file	Source	70.9 MB	Checksum Instructions
mariadb-10.3.5-winx64.msi	MSI Package	Windows x86_64	55.2 MB	Checksum Instructions
mariadb-10.3.5-winx64.zip	ZIP file	Windows x86_64	190.0 MB	Checksum Instructions
mariadb-10.3.5-win32.zip	ZIP file	Windows x86	153.3 MB	Checksum Instructions
mariadb-10.3.5-win32.msi	MSI Package	Windows x86	49.8 MB	Checksum Instructions

不用填表单,直接点击【No thanks just take me to the download】

Email

Company or Organization

Phone country code

Phone

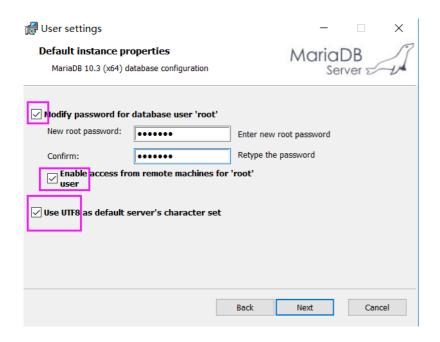

Country

China

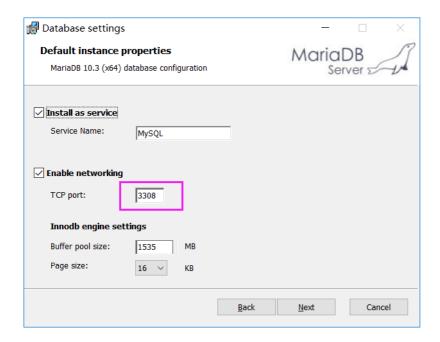

Submit & continue to download

No thanks, just take me to the download

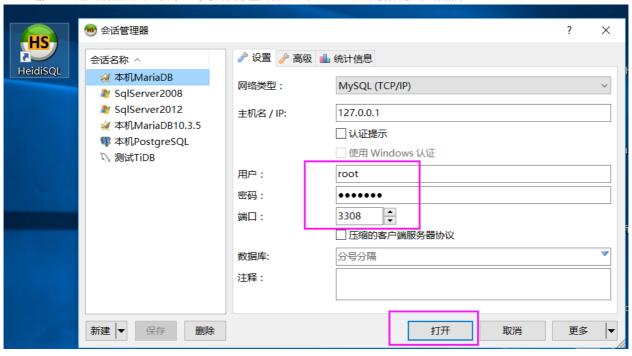

4、安装MariaDB,选中左边三个框,设置root用户初始密码demo!@# 这个密码后面也可以修改,下一步会用到这个密码

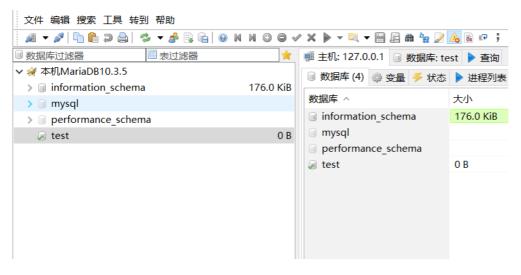

5、修改默认端口号3306为3308

- 三、MySql/MariaDB/TiDB管理工具HeidiSql
- 1、MariaDB安装完成后,里面已经包含了HeidiSql数据库管理工具,在桌面上点击快捷方式HeidiSql,【会话管理器】新建一个连接,输入端口3308,输入root用户的初始密码,就是上一步安装时设置的初始密码demo!@#点击【打开】连上数据库

恭喜,到这一步,三大软件已经开发成功了,下面请看第2个教程:

零基础1小时学编程,极简教程,简到奔溃dnc+vue+MySq1/MariaDB/TiDB开发电商平台系统
